Personalize Your Wedding with a Custom Monogram

Custom Monogram Projection

Having your initials or names projected onto the dance floor or a backdrop has the biggest “wow” effect at weddings and private events. It is the hottest wedding trend in lighting décor that will amaze your guests as they first walk into the room.

Monogram projection is done through the use of a specialized lighting fixture and a gobo. A gobo is a special metal or glass disc that goes into a high powered light fixture to produce the desired pattern wherever the light is projected.

Contact Mike's Music today to start designing your monogram from scratch or e-mail us your artwork / logo and we'll have our design team fine tune it to perfection for projection!

Custom monograms start at \$400.00.
